

Sprint 3

Software Engineering

Group: **Wildcats**

Tyler Dunaway, Jalin Evans, Jason Hamby, Kylee Willis

What instructions are tested and work

- We have tested and recorded the documentation for macOS and Amazon Linux. This includes documentation for setting up PostgreSQL and the installation of augur on both operating systems.
- We began working on Ubuntu but did not finish. (Got through database installation, fixed some commands/content - i.e. the *postgres* content at the end of the page.)

Which instructions you are saving for sprint 4

- The guide for Fedora Augur and functions
- Finalizing the wording and layout of all documentation
- Finishing Ubuntu's Augur installation
- Proofreading
